

Our Town: Same or Different?

What makes your community special? Is your town like other towns in the state? Is it like other towns in the country? Do buildings look different? What about the land? Are there rivers, beaches, or mountains?

How can we find out more about where we live and other parts of the country? We could use technology to visit and talk to students who live far away from us. We could share what our town is like and learn about theirs.

Maps are a great way to learn about an area, but let's be a little more creative... Let's create a 3D map so we can take our out-of-state friends on a virtual tour of our town!
